### **REASONS FOR ALLOWANCE**

1. The following is an examiner's statement of reasons for allowance. The prior art made of record in the attached form PTO-892 considered to be pertinent to the submitted application.

Yutkowitz et al. US# 5,710,498 disclose an apparatus for friction compensation including a control of an actuator for a moveable machine member to compensate for frictional forces affecting motion of the machine member. Yutkowitz et al. provide an estimate of actual velocity of a movable element of an actuator to control compensation for friction. The actuator is controlled to move a machine member according to position commands defining positions of the members. An estimate of velocity of machine member is made and in response to the estimated velocity, compensation is applied to control the actuator to overcome the effects of friction. Wherein, the velocity estimate is advantageous in compensating for change of friction associated with direction reversal. In Yutkowitz et al. a part of equation is a friction as function of speed includes viscous friction.

With reference to Fig. 4a-c as applied to the systems which permit direct input of torque commands, the state controlled compensation procedures produce updated torque commands for each position loop update interval. In Yutkowitz et al. equation includes beside the others predetermined torque compensation for positive and negative direction state, torque command, and friction compensation.

However, none of the prior art teaches or suggests the claimed combination including of a first component of actuator drive signal involving elastic modulus.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
